

NAHOON PLANT NOTICE

We hereby confirm receipt of the notice/instruction for Nahoon plant shut on 24 May 2016. After consultation with our Communications Department, it was resolved that Amatola Water/Department of Water and Sanitation should publish the planned bulk water interruption to BCMM on Daily Dispatch.

BCMM will then inform the Councillors and the consumers that might be affected through our SMS system and community radio stations.

We further confirm that BCMM is pumping at its maximum capacity to Outspan reservoir, therefore the pumping capacity cannot be increased.

The current pumping ratio is about 30% from Umzonyana and 70% from Nahoon WTW.

The shutdown will affect all Mdantsane areas and Reeston if anything goes wrong.

Amatola Water should ensure that the shutdown does not exceed the planned 12 hours.
